SURGEONS AS REFRACTIVE SURGERY PATIENTS

This month, *CRST Europe* polled refractive surgeons who have undergone refractive surgery to ask about their personal experiences from the patient's perspective.

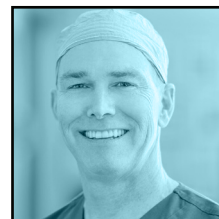

MITCHELL A. JACKSON, MD

- ▶ **Which procedure did you undergo, and what technology was used?**
I underwent bilateral LASIK for myopia in 2000. The procedure was performed with a Visx excimer laser (now Johnson & Johnson Vision) and a Moria microkeratome.
- ▶ **Were you satisfied with your outcomes?**
I was and am still extremely satisfied with my outcomes.
- ▶ **Why or why not?**
I no longer have to deal with contact lenses during long surgery days, working out, or traveling. I was becoming contact lens intolerant, so, for me, LASIK saved the day.

ALLON BARSAM, MA, MBBS, FRCOPHTH

- ▶ **Which procedure did you undergo, and what technology was used?**
I underwent femtosecond LASIK.
- ▶ **Were you satisfied with your outcomes?**
I was delighted with my outcomes.
- ▶ **Why or why not?**
This was a life-changing surgery for me. I now have much better vision than I had with glasses or contact lenses.

ROBERT K. MALONEY, MD

- ▶ **Which procedure did you undergo, and what technology was used?**
I underwent LASIK with an Automated Corneal Shaper (Bausch + Lomb; no longer available) and a Nidek excimer laser.
- ▶ **Were you satisfied with your outcomes?**
Yes.
- ▶ **Why or why not?**
For 2 decades after the surgery, I had 20/15 UCVA. After 20 years, I still enjoy 20/20 UCVA.

KARL G. STONECIPHER, MD

- ▶ **Which procedure did you undergo, and what technology was used?**
I underwent bilateral femtosecond LASIK in 2002 with the IntraLase platform (now Johnson & Johnson Vision) and the WaveLight FS200 (Alcon).
- ▶ **Were you satisfied with your outcomes?**
I was totally satisfied with my outcomes.
- ▶ **Why or why not?**
I have plano vision in my dominant right eye with 20/15 UCVA, and -1.00 D in my left eye with 20/40 UCVA by design. I am old and can read, and yes, I have halos, but I am otherwise perfect. I water ski; snow ski; wave surf; surf (or try to); and hunt dove, quail, and duck.

DAN Z. REINSTEIN, MD, MA(CANTAB), FRCSC, DABO, FRCOPHTH, FEBO

- ▶ **Which procedure did you undergo, and what technology was used?**
I underwent LASIK with Presbyond Laser Blended Vision performed with the MEL 90 excimer laser (Carl Zeiss Meditec).
- ▶ **Were you satisfied with your outcomes?**
I was very satisfied with my outcomes.
- ▶ **Why or why not?**
I have great vision at all distances from a 10-minute LASIK procedure that was very low risk, very accurate, and had no side effects. ■
